Groundsure has not identified significant risks likely to restrict any reasonable mortgage application for the property. Homebuyers also complies with Law Society practice notes on environmental risk in property transactions.

It is important to be fully informed of all risks associated with a property before completing your purchase.

Please read all the information in this report carefully.

Full assessments for these risks are available in other Groundsure searches including the Groundsure Avista 7 in 1 report. Contact Groundsure or your search provider for further details.
Overview of findings and recommendations

These relate to environmental risks that may affect the enjoyment of the property, health, insurance premiums, property values and/or a lender's willingness to lend.

We have searched a comprehensive library of information to determine the results within this report. We only provide maps and data tables when we have identified features within the search radius or we consider the results to be of note. A list of the other datasets that we have searched is provided for you in the back of this report.

Flood

Groundwater
The property is assessed to have a groundwater flood risk of moderate or higher. Key recommended next steps:

- if the property has a basement or other section below ground, investigate whether tanking is possible. This is a process where basement areas are sealed with a watertight material to prevent groundwater seeping in
- look at the search result in the context of its locality. Discuss with the seller (and potentially their neighbours) to see if groundwater flooding is common there and what measures are in place to combat it
- consider conducting a visual check at the property looking for water staining, damp patches or mould growth. Be aware of any damp smells. It is also worth checking the survey to see if any of these things have been reported
- further advice on groundwater flooding has been produced by Environment Agency and the Local Government Association and can be found at https://www.gov.uk/government/uploads/system/uploads/attachment_data/file/297421/flho0911bugi-e-e.pdf

Other considerations

These are potential actions associated with non-environmental search returns such as mobile masts and planning constraints.

Planning constraints

Visual and cultural designations
The property lies within 50m of a visually or culturally protected site or area. Key recommended next steps:

- seek further guidance from the local planning department on any likely restrictions if considering any property development
Environmental summary

Environmental searches are designed to ensure that significant hazards and risks associated with this property are identified and considered alongside the investment in or purchase of a property.

Please see the guidance section on page 2 for further advice.

Contaminated Land

No significant concerns have been identified as a result of the contaminated land searches.

- Past Land Use: Passed
- Waste and Landfill: Passed
- Current and Recent Industrial: Passed

Flood Risk

Property's overall risk assessment for river, coastal, surface water and groundwater flooding is low.

Further explanation of flood risk assessment can be seen here: groundsure.com/understanding-flood-risk

- River and Coastal Flooding: Very Low
- Groundwater Flooding: Moderate
- Surface Water Flooding: Negligible
- Past Flooding: Not Identified
- Flood Storage Areas: Not Identified

Floodability Rating: Green

The rating is compiled by JBA, the UK’s leading flood expert. Please see page 12.

Ground Stability

No significant concerns have been identified as a result of the ground stability searches. No action required.

- Natural Ground Stability: Low
- Non-Natural Ground Stability: Not Identified

Radon

Local levels of radon are considered normal.

- Not in a radon affected area

- Percentage of affected homes in your local area is: Less than 1%.
Groundwater flooding

JBA data indicates that the property is in an area with a Moderate risk of groundwater flooding. JBA data indicates that groundwater levels are between 0.5m and 5m below the ground surface. There is a risk of flooding to subsurface assets but surface manifestation of groundwater is unlikely.

Some of the responses contained in this report are based on data and information provided by the Natural Environment Research Council (NERC) or its component body British Geological Survey (BGS). Your use of any information contained in this report which is derived from or based upon such data and information is at your own risk. Neither NERC nor BGS gives any warranty, condition or representation as to the quality, accuracy or completeness of such information and all liability (including for negligence) arising from its use is excluded to the fullest extent permitted by law. Your use of the data/report/assessment constitutes your agreement to bring no claim against NERC or BGS in connection with it.
Energy summary

The property has been identified to lie within 5km of one or more energy features. The Homebuyers report summarises these on this page.

If required, full details on these energy features including a detailed location plan relative to the property can be available when you purchase a Groundsure Energy report or the comprehensive Groundsure Avista report via your preferred searches provider.

Oil and Gas
No active or planned wells or extraction areas (such as fracking sites) identified near the property.

- Oil and Gas Areas: Not Identified
- Oil and Gas Wells: Not Identified

Wind and Solar
Our search of existing and planned renewable wind and solar infrastructure has identified results.

- Wind: Identified
- Solar: Identified

Energy Infrastructure
Our search of major energy transmission or generation infrastructure and nationally significant infrastructure projects has identified results.

- Power stations: Identified
- Energy Infrastructure Projects: Not Identified
- Not Identified
Transportation summary

The property has not been identified to lie within the specified distance of one or more of the transportation features detailed below.

If required, full details on these transportation features including a detailed location plan relative to the property are available in additional Groundsure searches. Please contact Groundsure or your preferred searches provider for details of the most appropriate report.

**HS2**

No results for Phase 1 or Phase 2 of the HS2 project (including the 2016 amendments) have been identified within 5km of the property. However, HS2 routes are still under consultation and exact alignments may change in the future.

- **HS2 Route**: Not identified
- **HS2 Safeguarding**: Not identified
- **HS2 Stations**: Not identified
- **HS2 Depots**: Not identified
- **HS2 Noise**: Not assessed
- **HS2 Visual impact**: Not assessed

**Crossrail**

The property is not within 250 metres of either the Crossrail 1 or Crossrail 2 project.

- **Crossrail 1 Route**: Not identified
- **Crossrail 1 Stations**: Not identified
- **Crossrail 1 Worksites**: Not identified
- **Crossrail 2 Route**: Not identified
- **Crossrail 2 Stations**: Not identified
- **Crossrail 2 Worksites**: Not identified
- **Crossrail 2 Safeguarding**: Not identified
- **Crossrail 2 Headhouse**: Not identified

**Other Railways**

The property is not within 250 metres of any active or former railways, subway lines, DLR lines, subway stations or railway stations.

- **Active Railways and Tunnels**: Not identified
- **Historical Railways and Tunnels**: Not identified
- **Railway and Tube Stations**: Not identified
- **Underground**: Not identified
Planning summary

Planning Applications
Using Local Authority planning information supplied and processed by Glenigan dating back 10 years, this information is designed to help you understand possible changes to the area around the property. Please note that even successful applications may not have been constructed and new applications for a site can be made if a previous one has failed. We advise that you use this information in conjunction with a visit to the property and seek further expert advice if you are concerned or considering development yourself.

Total applications

This total includes large developments within 500 m, small developments within 125 m and house extensions within 50 m. If required, full details on these applications including a detailed location plan relative to the property can be available when you purchase a Groundsure Planning Report or the comprehensive Groundsure Avista report via your preferred searches provider.

Planning constraints

Protected areas have been identified within 50 metres of the property.

<table>

Visual and Cultural Designations

Conservation Areas
Conservation Areas exist to protect special architecture and historic interest in an area. It may mean that the property is located in or close to a beautiful or architecturally interesting place to live. There may be extra planning controls restricting some development. This particularly applies to developing the outside of the building and any trees at the property.

</tr>
</tbody>
</table>
Registered Parks and Gardens

Registered parks or gardens are a designed landscape considered of historic interest. Although the inclusion of a historic park or garden on the register in itself brings no additional statutory controls, local authorities are required by central government to consider registration material in planning terms, so local planning authorities must take into account the historic interest of the site when determining whether or not to grant planning permission.

Datasets searched but no features were found at this location

In addition to the results detailed in the maps and tables in this report, all of these datasets were also queried but did not reveal any results relevant to the site or surrounding area.

**Contaminated Land**
- Former industrial land use (1:10,560 and 1:10,000 scale)
- Former tanks
- Former energy features
- Former petrol stations
- Former garages
- Former military land
- Former landfill (from British Geological Survey records, 1973)
- Former landfill (from Local Authority and historical mapping records)
- Waste site no longer in use
- Active or recent landfill
- Former landfill (from Environment Agency Records)
- Active or recent licensed waste sites
- Recent industrial land uses
- Current or recent petrol stations
- Dangerous or explosive sites
- Hazardous substance storage/usage
- Sites designated as Contaminated Land
- Historical licensed industrial activities
- Current or recent licensed industrial activities
- Local Authority licensed pollutant release
- Pollutant release to surface waters
- Pollutant release to public sewer
- Dangerous industrial substances (D.S.I. List 1)
- Dangerous industrial substances (D.S.I. List 2)
- Pollution incidents

**Flood Risk**
- Risk of flooding from rivers and the sea
- Flood storage areas: part of floodplain
- Historical flood areas
- Areas benefiting from flood defences
- Flood defences
- Proposed flood defences
- Surface water flood risk

**Ground stability**
- Natural ground subsidence
- Natural geological cavities
- Coal mining
- Non-coal mining
- Mining cavities
- Infilled land
- Radon

**Energy Infrastructure**
- Electricity transmission lines and pylons

**Planning constraints**
- Sites of Special Scientific Interest
- Internationally important wetland sites (Ramsar Sites)
- Special Areas of Conservation
Contaminated Land assessment methodology

As part of this report Groundsure provide a professional assessment of the risks posed by key environmental information which could lead to the property being designated as 'Contaminated Land' as defined under Part 2A of the Environmental Protection Act 1990. This assessment is based on the following data:

- historical land use (compiled from 1:10,000 and 1:10,560 maps)
- petrol stations, garages, energy features and tanks (compiled from 1:1,250 and 1:2,500 maps) – for selected areas.
- historic military / ordnance sites
- landfill and waste transfer/treatment or disposal sites (including scrap yards)
- current and recent industrial uses (as defined by PointX data)
- Catalist petrol station
- Part A(1), Part A(2) and Part B Authorisations
- Control of Major Accident Hazards Sites (COMAH) and Notification of Installations Handling Hazardous Substances (NIHHS)
- sites determined as Contaminated Land under Part 2A EPA 1990
- Planning Hazardous Substance Consents
- Environment Agency Recorded Pollution Incidents
- Dangerous Substances Inventory Releases (DSI)
- Red List Discharge Consent

The level of risk associated with the property is either Passed or In Need of Further Assessment. If the site is In Need of Further Assessment it does not necessarily mean that the site is unsuitable for purchase, but only that further assessment of the risk associated with the site is required.

Method Statement

In assessing specific site risk, Groundsure follows principles used extensively throughout the environmental consultancy sector. Our system looks at the potential for specific industries to have generated residual contamination and for this contamination to remain at a site, or to have migrated to neighbouring sites. Sites are scored based on this system and if a site scores highly it indicates a high level of risk.

Limitations of the Study

This screening process reviews historical mapping and a range of current databases. The historical land use database reviewed for this study does NOT include 1:2,500 or 1:1,250 scale maps except for Groundsure’s additional information database of selected features namely tanks, energy features, petrol filling stations and garages. This additional information database covers the majority of the UK, but not all. Where 1:2500 or 1:1250 scale maps are utilised all relevant and available map epochs to Groundsure are used. Additionally, this review does NOT include specific enquiries to the Local Authority who may hold additional information and it does NOT include a site visit/inspection. Your attention is drawn to the Terms and Conditions of Groundsure Limited under which this service is provided.
Flood information

The Flood Risk Assessment section is based on datasets covering a variety of different flooding types. No inspection of the property or of the surrounding area has been undertaken by Groundsure or the data providers. The modelling of flood hazards is extremely complex and in creating a national dataset certain assumptions have been made and all such datasets will have limitations. These datasets should be used to give an indication of relative flood risk rather than a definitive answer. Local actions and minor variations, such as blocked drains or streams etc. can greatly alter the effect of flooding. A low or negligible modelled flood risk does not guarantee that flooding will not occur. Nor will a high risk mean that flooding definitely will occur. Groundsure's overall flood risk assessment takes account of the cumulative risk of river, coastal, surface water (pluvial), and groundwater flooding and historic flood events.

Risk of flooding from rivers and the sea
This is an assessment of flood risk for England and Wales produced using local data and expertise, provided by Environment Agency. It shows the chance of flooding from rivers or the sea presented in categories taking account of flood defences and the condition those defences are in. The model uses local water level and flood defence data to model flood risk.

Historic flood events
Over 86,000 events are recorded within this database. This data is used to understand where flooding has occurred in the past and provides details as available. Absence of a historic flood event for an area does not mean that the area has never flooded, but only that Environment Agency/Natural Resources Wales do not currently have records of flooding within the area. Equally, a record of a flood footprint in previous years does not mean that an area will flood again, and this information does not take account of flood management schemes and improved flood defences.

Surface water flooding
JBA Risk Management surface water flood map identifies areas likely to flood following extreme rainfall events, i.e. land naturally vulnerable to surface water or “pluvial” flooding. This data set was produced by simulating 1 in 75 year, 1 in 200 year and 1 in 1000 year rainfall events. Modern urban drainage systems are typically built to cope with rainfall events between 1 in 20 and 1 in 30 years, though older ones may even flood in a 1 in 5 year rainstorm event.

Proposed flood defences
The data includes all Environment Agency/Natural Resources Wales's projects over £100K that will change or sustain the standards of flood defence in England and Wales over the next 5 years. It also includes the equivalent schemes for all Local Authority and Internal Drainage Boards.

Flood storage areas
Flood Storage Areas may also act as flood defences. A flood storage area may also be referred to as a balancing reservoir, storage basin or balancing pond. Its purpose is to attenuate an incoming flood peak to a flow level that can be accepted by the downstream channel. It may also delay the timing of a flood peak so that its volume is discharged over a longer time interval. These areas are also referred to as Zone 3b or 'the functional floodplain' and have a 5% or greater chance of flooding in any given year, or is designed to flood in the event of an extreme (0.1%) flood or another probability which may be agreed between the Local Planning Authority and Environment Agency/Natural Resources Wales, including water conveyance routes. Development within Flood Storage Areas is severely restricted.
Groundwater flooding
Groundwater flooding is flooding caused by unusually high groundwater levels. It occurs as excess water emerging at the ground surface or within underground structures such as basements. Groundwater flooding tends to be more persistent than surface water flooding, in some cases lasting for weeks or months, and it can result in significant damage to property. This risk assessment is based on a 5m Digital Terrain Model (DTM) and a 1 in 100 year return period.

JBA Floodability
The property has been rated as Green.

Flood Re is a joint initiative between the Government and insurers. It was set up to help UK residents who are at risk of flooding to obtain flood cover as part of their household insurance. There are several exemptions from the Flood Re scheme including new properties built after 1 January 2009, commercial property, buy to let properties and blocks of flats with four or more units. A full list of exemptions is available on the Flood Re website (https://www.floodre.co.uk/can-flood-re-help-me/eligibility-criteria/).

JBA's Floodability rating provides an indication of the likelihood of a property being ceded into the Flood Re scheme from river, coastal and surface water flood only. It does not consider the many other factors needed for ceding into the Flood Re scheme, nor does it consider the other requirements for obtaining insurance.

The JBA Floodability Index is categorised on a fivefold scale:

Green indicates a level of flood hazard such that insurance covering flood risk may be obtainable relatively easily as part of a standard household insurance contract. There is a very low possibility of insurance companies ceding the property into the Flood Re scheme unless the property has flooded in the past.

Amber indicates a level of flood hazard such that insurance covering flood risk may be available but may be subject to increased premiums and non-standard and/or additional terms. There is a low possibility of insurance companies ceding the property into the Flood Re scheme unless the property has flooded in the past.

Red indicates a level of flood hazard such that standard priced insurance covering flood risk is likely to be subject to increased premiums and non-standard and/or additional terms. There is a moderate possibility of insurance companies ceding the property into the Flood Re scheme particularly if the property has flooded in the past.

Black 1 indicates a level of flood hazard such that standard priced insurance covering flood risk is likely to be subject to increased premiums and non-standard and/or additional terms. There is a high possibility of insurance companies ceding the property into the Flood Re scheme, especially if the property has flooded in the past.

Black 2 indicates a level of flood hazard such that standard priced insurance covering flood risk is likely to be subject to increased premiums and non-standard and/or additional terms. There is a very high possibility of insurance companies ceding the property into the Flood Re scheme, especially if the property has flooded in the past.
Search Code and Groundsure terms and conditions

IMPORTANT CONSUMER PROTECTION INFORMATION
This search has been produced by Groundsure Ltd, Sovereign House, Church Street, Brighton, BN1 1UJ. Tel: 08444 159 000. Email: info@groundsure.com which is registered with the Property Codes Compliance Board (PCCB) as a subscriber to the Search Code. The PCCB independently monitors how registered search firms maintain compliance with the Code.

The Search Code
- provides protection for homebuyers, sellers, estate agents, conveyancers and mortgage lenders who rely on the information included in property search reports undertaken by subscribers on residential and commercial property within the United Kingdom
- sets out minimum standards which firms compiling and selling search reports have to meet
- promotes the best practice and quality standards within the industry for the benefit of consumers and property professionals
- enables consumers and property professionals to have confidence in firms which subscribe to the code, their products and services

By giving you this information, the search firm is confirming that they keep to the principles of the Code. This provides important protection for you.

The Code's core principles
Firms which subscribe to the Search Code will:
- display the Search Code logo prominently on their search reports
- act with integrity and carry out work with due skill, care and diligence
- at all times maintain adequate and appropriate insurance to protect consumers
- conduct business in an honest, fair and professional manner
- handle complaints speedily and fairly
- ensure that products and services comply with industry registration rules and standards and relevant laws
- monitor their compliance with the Code

Complaints Advice
If you have a query or complaint about your search, you should raise it directly with the search firm, and if appropriate ask for any complaint to be considered under their formal internal complaints procedure. If you remain dissatisfied with the firm's final response, after your complaint has been formally considered, or if the firm has exceeded the response timescales, you may refer your complaint for consideration under The Property Ombudsman scheme (TPOs). The Ombudsman can award up to £5,000 to you if the Ombudsman finds that you have suffered actual financial loss and/or aggravation, distress or inconvenience as a result of your search provider failing to keep to the Code. Please note that all queries or complaints regarding your search should be directed to your search provider in the first instance, not to TPOs or to the PCCB.

TPO's Contact Details:
The Property Ombudsman scheme, Milford House, 43-55 Milford Street, Salisbury, Wiltshire SP1 2BP. Tel: 01722 333306 Fax: 01722 332296 Email: admin@tpos.co.uk Web: https://www.tpos.co.uk/

You can get more information about the PCCB from https://pccb.org.uk/.

PLEASE ASK YOUR SEARCH PROVIDER IF YOU WOULD LIKE A COPY OF THE SEARCH CODE
COMPLAINTS PROCEDURE: If you want to make a complaint, we will:

- acknowledge it within 5 working days of receipt
- normally deal with it fully and provide a final response, in writing, within 20 working days of receipt
- keep you informed by letter, telephone or e-mail, as you prefer, if we need more time
- provide a final response, in writing, at the latest within 40 working days of receipt
- liaise, at your request, with anyone acting formally on your behalf

Complaints should be sent to:
Operations Director, Groundsure Ltd, Sovereign House, Church Street, Brighton, BN1 1UJ. Tel: 08444 159 000. Email: info@groundsure.com If you are not satisfied with our final response, or if we exceed the response timescales, you may refer the complaint to The Property Ombudsman scheme (TPOs): Tel: 01722 333306, E-mail: admin@tpos.co.uk We will co-operate fully with the Ombudsman during an investigation and comply with their final decision.

Groundsure’s Terms and Conditions can be viewed online at this link: [https://www.groundsure.com/terms-and-conditions-may25-2018](https://www.groundsure.com/terms-and-conditions-may25-2018)

**Important consumer protection information**

All of the advice and reports that Groundsure produces are covered by a comprehensive Remediation Contribution policy to ensure customers are protected, see [https://www.groundsure.com/remediation](https://www.groundsure.com/remediation) for full details.

**Data providers**

Groundsure works with respected data providers to bring you the most relevant and accurate information in your Homebuyers report. To find out who they are and their areas of expertise see [https://www.groundsure.com/sources-reference](https://www.groundsure.com/sources-reference).
